

Air Force Experience Overview

Segue Technologies Inc. (Segue), a wholly-owned subsidiary of Tetra Tech, Inc., is a leading Software Engineering, support, and management consulting firm based in Arlington, Virginia. Within Tetra Tech, Segue is part of an international network of service providers for mission-critical Information Technology support services, including business transformation, identity management, information security and cybersecurity, business process re-engineering, enterprise system architecture and development, geospatial analysis, and data analytics.

Our processes are guided by industry best practices appraised at Capability Maturity Model Integration (CMMI) level 3 and are supported by an ISO 9001:2015 Quality Management System (QMS).

OUR CORE SERVICE AREAS INCLUDE:

- Business System Modernization
- Custom Application Development
- Systems Operations & Maintenance Support
- Modeling & Simulation Development & Support Services
- Mobile Application Development—iOS and Android
- Cybersecurity and Risk Management Framework (RMF) Support
- Cloud SaaS / PaaS—Based Product Development
- Data Integration and Analytics

Agile, Cost-Effective Modernization

Segue is on the leading edge of technology and innovation. We were awarded an SBIR project to configure and implement a no/low code software platform solution in the cloud for the AFRL. The AF is moving toward aPaaS on areas that ERP is not suitable, and supports the delivery of microservices in lieu of custom development. Segue's approach is effective in modernizing systems, migrating to the cloud and helping organizations better connect their workforce.

Pegasystems is a no/low-code application development platform which includes Business Process Management. Use of a BPM platform such as Pega can address the cost and complexity associated with BPM efforts and minimize these challenges for future evolutions. These platforms allow organizations to focus on the capability they need, and free their operations from the constraints of standalone custom applications.

Innovation in Contracting

SBIR: Segue was awarded a Small Business Innovation Research (SBIR) Phase I contract for system modernization using the Pegasystems Low/No Code BPM Platform.

Any Federal Agency can award Phase III contracts for similar requirements on a Sole Source basis, as SBIR Phase I and II awards satisfy competition requirements.

Custom Application Development & Sustainment

Manpower Programming and Execution System (MPES) - HAF/A1M

- MPES is the Air Force enterprise system supporting manpower budgeting, unit manning position management, workforce modeling, and reporting and analysis for the Active, Guard, Reserve, and civilian workforce. It is the authoritative data source for all Air Force manpower actions and is used to generate all changes to the official Air Force manpower budget. MPES has over 2,000 users worldwide and manages nearly 850,000 Air Force positions (current and projected).
- Segue provides custom development and sustainment for all MPES applications which include the Future Years Defense Program (FYDP), Unit Manpower Document (UMD), and the Manpower/Senior Grade Allocation Modules (MGAM/SGAM).

IT Portfolio Management Support

Information Technology Investment Portfolio Suite (ITIPS) - SAF/CIO A6

- ITIPS is an automated IT investment portfolio management tool used to support Air Force IT Registration, IT Budget, and IT Compliance processes and provides decision support for Program Managers (PMs), Portfolio Managers (PfMs), IT Managers, and AF Senior Leadership.
- Segue supports the capture and documentation of AF IT investment business processes and provides ITIPS development, testing, deployment, sustainment, and user training to maintain a robust IT portfolio management capability.

IT Portfolio Management Support

Information Technology Investment Portfolio Suite (ITIPS) - SAF/CIO A6

- ITIPS is an automated IT investment portfolio management tool used to support Air Force IT Registration, IT Budget, and IT Compliance processes and provides decision support for Program Managers (PMs), Portfolio Managers (PfMs), IT Managers, and AF Senior Leadership.
- Segue supports the capture and documentation of AF IT investment business processes and provides ITIPS development, testing, deployment, sustainment, and user training to maintain a robust IT portfolio management capability.

Data Integration and Analytics

Business Intelligence Services (BIS) - (SAF/AQXE)

- The SAF/AQX data warehouse integrates data from various disparate sources to include the Federal Procurement Data System (FPDS / USA Spending), Google Finance, Dun and Bradstreet's Data Universal Numbering, and multiple Air Force financial and contract data systems to provide actionable data analysis on the health of the contractors responsible for ongoing and pending acquisition programs.
- Segue develops and maintains a large and complex data warehouse to populate and integrate Federal contracting and Air Force programs data using scripted Extract, Transform, and Load processes and created a presentation layer using COTS tools to enable ad-hoc and canned data reporting and analysis.

Air Force Customers

- HQ AF, Manpower & Personnel (HAF/A1M)
- AF Research Laboratory (AFRL/RCB)
- Air Education and Training Command (AETC)
- Air Mobility Command (AMC)
